New Eco-Friendly Electric Boat Charter Launches Just in Time for Summer

Toms River, NJ Electric Bay Cruises today announced Leisure Cruise Charters leaving out of Toms River, NJ! Electric Bay Cruises are offering 2-hour, 4-hour, Sunset and Custom Charter Cruises on their Duffy Electric Cuddy Cabin, providing a new way for friends, families, and couples to enjoy being out on the water while keeping those waterways clean.

“Time out on the water is life here at the Jersey Shore, why not offer a cleaner, more quiet option for those who want to enjoy the water that way?” says Jason Gumble, CEO at Electric Bay Cruises. “Our hope is that we encourage people to be more open to electric boating options in the future.”

Electric Bay’s philosophy is that you don’t always need to go fast and loud to enjoy being out on the water. Sometimes a leisurely trip with a quiet engine and comfortable seating is exactly what’s needed.

We’ve been shown that small steps can lead to big things and it’s our hope that this small example of being clean and sustainable will encourage others to do the same. After all, we only have one planet to live on, let’s do our part to keep her clean.

Leisure cruises will be available starting May, 1 for more information on Electric Bay Cruises visit www.electric-bay.com.

About Electric Bay Cruises

Electric Bay Cruises is the Jersey Shore’s Premier electric boat charter company. The company was founded with sustainability and cleaner water ways in mind, while at the same time, providing a comfortable, safe, and enjoyable voyage on their vessels. Electric Bay’s mission is to bring awareness to electric boating, in hopes that more people utilize that technology in the future.
